May 2022

September 2020 – August 2024

EXPERIENCE

Bank of America – London, UK

Software Engineer Analyst – (*Foreign Exchange Cash Team*)

January 2025 – Present

- Contributing to the development of a flagship trading app used by 500+ traders and salespeople globally to book and manage foreign exchange cash trades, with a strong focus on Python solutions
- Leading onboarding and training for new joiners (5+ to date) and providing continuous technical support to accelerate team integration.
- Managing production support during American hours by monitoring, resolving, and escalating weekly inflows of issues, and delivering daily reports to maintain transparency with stakeholders.

Agriwater Corp- Remote- Alabama, USA (*Personal Assistant to CEO*)

September 2024 – March 2025

- Managed company communications by running social media accounts, maintaining a stakeholder/farmer contact database, and preparing surveys and reports to support projects.
- Supported the CEO through funding applications, pitch deck preparation, financial meeting notes, and active participation in advisor discussions.
- Streamlined team operations by managing recruitment processes, reviewing interview responses, coordinating onboarding, and ensuring smooth internal workflows.

Bank of America, London (*Software Engineering Intern*)

June – August 2023

- Worked on trading containers to change the display of quoting values of traders using java.
- Used Python to create an automated report generating code to get trading statistics across the trading markets at the bank.
- Wrote python code to add new Amps topic injector to a KDB instance and made the time zone from the Bloomberg and MarketAxess platforms consistent to help traders record correct trends from the log file.

Société Générale Ghana (*Information systems and Technology Intern*)

July – August 2022

- Worked under the Functional support unit of the Information Systems and Technology Department
- Helped staff solve issues they have with all the apps used by the Bank (Amplitude, cockpit, GUMS etc.) through requests sent via platform known as SysAid.
- Also worked on Report writing based on customer account statistics on the bank's server known as SIMBA.

PROJECTS

Ashesi UniBite Web Application

December 2023

- Led the development of a food ordering app for Ashesi University, enhancing campus dining convenience by integrating all food joints and optimizing order processes.
- Mastered full-stack development seamlessly merging backend and frontend components for a cohesive user experience.
- Demonstrated expertise in project management (Jira), API integration, and testing (Postman), including successful implementation of Paystack for streamlined payment processing.

Personal Portfolio Website

October 2022

- Carefully built a personal portfolio website using React, HTML and CSS
- Used the project as a learning experience to better understand what React is all about.
- Built the website to make good use of semester break and that proved to be very helpful.

Ashesi University Hospital Management Project

December 2021

- Designed a UML diagram for a hospital management system.
- Wrote a program in python for the management system.
- Evaluated group project and ensured the completion of project milestones.

SKILLS

Programming languages: Proficiency in Python, Java, and SQL, C

Web Technological skills: CSS, React, JavaScript, and HTML.

Statistical Analysis tools: R studio, R, Google Colab.

LEADERSHIP EXPERIENCE
